## Independent Auditor's Report

To the Board of Education  
Clarenceville School District of Oakland  
and Wayne Counties

### Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, each major fund, and aggregate remaining fund information of Clarenceville School District of Oakland and Wayne Counties (the "School District") as of and for the year ended June 30, 2019 and the related notes to the financial statements, which collectively comprise Clarenceville School District of Oakland and Wayne Counties' basic financial statements, as listed in the table of contents.

#### ***Management's Responsibility for the Financial Statements***

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

#### ***Auditor's Responsibility***

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

#### ***Opinions***

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, each major fund, and aggregate remaining fund information of Clarenceville School District of Oakland and Wayne Counties as of June 30, 2019 and the respective changes in its financial position for the year then ended in accordance with accounting principles generally accepted in the United States of America.

To the Board of Education  
Clarenceville School District of Oakland  
and Wayne Counties

**Required Supplemental Information**

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, pension and OPEB system schedules of funding progress and employer contributions, and the major fund budgetary comparison schedule, as identified in the table of contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, which considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplemental information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

**Other Supplemental Information**

Our audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise Clarenceville School District of Oakland and Wayne Counties' basic financial statements. The other supplemental information, as identified in the table of contents, is presented for the purpose of additional analysis and is not a required part of the basic financial statements.

The other supplemental information, as defined in the table of contents, is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the other supplemental information is fairly stated in all material respects in relation to the basic financial statements as a whole.

**Other Reporting Required by Government Auditing Standards**

In accordance with *Government Auditing Standards*, we have also issued our report dated September 6, 2019 on our consideration of Clarenceville School District of Oakland and Wayne Counties' internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, grant agreements, and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering Clarenceville School District of Oakland and Wayne Counties' internal control over financial reporting and compliance.

September 6, 2019

## Management's Discussion and Analysis

---

This section of Clarenceville School District of Oakland and Wayne Counties' (the "School District") annual financial report presents our discussion and analysis of the School District's financial performance during the year ended June 30, 2019. Please read it in conjunction with the School District's financial statements, which immediately follow this section.

### **Using this Annual Report**

This annual report consists of a series of financial statements and notes to those financial statements. These statements are organized so the reader can understand Clarenceville School District of Oakland and Wayne Counties financially as a whole. The government-wide financial statements provide information about the activities of the whole School District, presenting both an aggregate view of the School District's finances and a longer-term view of those finances. The fund financial statements provide the next level of detail. For governmental activities, these statements tell how services were financed in the short term, as well as what remains for future spending. The fund financial statements look at the School District's operations in more detail than the government-wide financial statements by providing information about the School District's most significant funds - the General Fund and Sinking Fund - with all other funds presented in one column as nonmajor funds. The remaining statements, the statement of fiduciary net position and statement of changes in fiduciary net position, present financial information about activities for which the School District acts solely as an agent for the benefit of students and parents. This report is composed of the following elements:

#### **Management's Discussion and Analysis (MD&A) (Required Supplemental Information)**

##### **Basic Financial Statements**

Government-wide Financial Statements

## Management's Discussion and Analysis (Continued)

---

### **Reporting the School District as a Whole - Government-wide Financial Statements**

One of the most important questions asked about the School District is, "As a whole, what is the School District's financial condition as a result of the year's activities?" The statement of net position and the statement of activities, which appear first in the School District's financial statements, report information on the School District as a whole and its activities in a way that helps you answer this question. We prepare these statements to include all assets, deferred outflows of resources, liabilities, and deferred inflows of resources using the accrual basis of accounting, which is similar to the accounting used by most private sector companies. All of the current year's revenue and expenses are taken into account, regardless of when cash is received or paid.

These two statements report the School District's net position, the difference between assets plus deferred outflows of resources and liabilities plus deferred inflows of resources, as reported in the statement of net position, as one way to measure the School District's financial health or financial position. Over time, increases or decreases in the School District's net position, as reported in the statement of activities, are indicators of whether its financial health is improving or deteriorating. The relationship between revenue and expenses is the School District's operating results. However, the School District's goal is to provide services to our students, not to generate profits as commercial entities do. One must consider many other nonfinancial factors, such as the quality of the education provided and the safety of the schools, to assess the overall health of the School District.

The statement of net position and the statement of activities report the governmental activities for the School District, which encompass all of the School District's services, including instruction, support services, community services, athletics, and food services. Property taxes, unrestricted state aid (foundation allowance revenue), and state and federal grants finance most of these activities.

### **Reporting the School District's Fund Financial Statements**

The School District's fund financial statements provide detailed information about the most significant funds - not the School District as a whole. Some funds are required to be established by state law and by bond covenants. However, the School District establishes other funds to help it control and manage money for particular purposes (the Food Service Fund is an example) or to show that it is meeting legal responsibilities for using certain taxes, grants, and other money (such as bond-funded construction funds used for voter-approved capital projects).

### **Governmental Funds**

Governmental fund reporting focuses on showing how money flows into and out of funds and the balances left at year end that are available for spending. They are reported using an accounting method called modified accrual accounting, which measures cash and all other financial assets that can readily be converted to cash. The governmental fund statements provide a detailed short-term view of the operations of the School District and the services it provides. Governmental fund information helps determine whether there are more or fewer financial resources that can be spent in the near future to finance the School District's programs. We describe the relationship (or differences) between governmental activities (reported in the statement of net position and the statement of activities) and governmental funds in a reconciliation.

### **Fiduciary Funds**

The School District has certain fiduciary responsibility for its student activity funds. All of the School District's fiduciary activities are reported in a separate statement of fiduciary assets and liabilities. We exclude these activities from the School District's other financial statements because the School District cannot use these assets to finance its operations. The School District is responsible for ensuring that the assets reported in these funds are used for their intended purposes.

# Clarenceville School District of Oakland and Wayne Counties

## Management's Discussion and Analysis (Continued)

### The School District as a Whole

Recall that the statement of net position provides the perspective of the School District as a whole. The following table provides a summary of the School District's net position as of June 30, 2019 and 2018:

	Governmental Activities	
	2019	2018
	(in millions)	
<b>Assets</b>		
Current and other assets	\$ 9.2	\$ 10.3
Capital assets	14.8	11.9
Total assets	24.0	22.2
<b>Deferred Outflows of Resources</b>	12.9	7.0
<b>Liabilities</b>		
Current liabilities	3.1	3.2
Noncurrent liabilities	0.4	0.4
Net pension liability	36.5	32.2
Net OPEB liability	9.4	11.0
Total liabilities	49.4	46.8
<b>Deferred Inflows of Resources</b>	7.7	4.2
<b>Net Position</b>		
Net investment in capital assets	14.8	11.9
Restricted	1.0	3.6
Unrestricted	(36.0)	(37.3)
Total net position	<u>\$ (20.2)</u>	<u>\$ (21.8)</u>

The above analysis focuses on net position. The change in net position of the School District's governmental activities is discussed below. The School District's net position was a deficit of \$(20.2) million at June 30, 2019. Net investment in capital assets totaling \$14.8 million compares the original cost less depreciation of the School District's capital assets. Restricted net position is reported separately to show legal constraints from debt covenants and enabling legislation that limit the School District's ability to use that net position for day-to-day operations. The remaining amount of net position, \$(36.0) million, was unrestricted.

The \$(36.0) million in unrestricted net position of governmental activities represents the accumulated results of all past years' operations and the impact from adoption of GASB Statement Nos. 68 and 75 (recording the School District's share of the net pension and OPEB liabilities from the state-managed retirement system). Unrestricted net position, when available, would enable the School District to meet working capital and cash flow requirements and provide for future uncertainties. The operating results of the General Fund and the change in the net pension/OPEB liabilities will have significant impacts on the change in unrestricted net position (deficit) from year to year.

# Clarenceville School District of Oakland and Wayne Counties

## Management's Discussion and Analysis (Continued)

The results of this year's operations for the School District as a whole are reported in the condensed statement of activities below, which shows the changes in net position for the years ended June 30, 2019 and 2018:

	Governmental Activities	
	2019	2018
	(in millions)	
<b>Revenue</b>		
Program revenue:		
Charges for services	\$ 0.7	\$ 0.7
Operating grants	6.7	6.6
General revenue:		
Taxes	3.7	3.5
State aid not restricted to specific purposes	12.5	11.7
Other	0.7	0.2
Total revenue	<u>24.3</u>	<u>22.7</u>
<b>Expenses</b>		
Instruction	12.9	13.2
Support services	7.1	6.8
Athletics	0.4	0.3
Food services	0.9	0.7
Community services	0.4	0.4
Depreciation expense (unallocated)	1.0	1.0
Total expenses	<u>22.7</u>	<u>22.4</u>
<b>Change in Net Position</b>	1.6	0.3
<b>Net Position - Beginning of year</b>	(21.8)	(11.0)
<b>Cumulative Effect of Change in Accounting</b>	-	(11.1)
<b>Net Position - Beginning of year</b>	<u>(21.8)</u>	<u>(22.1)</u>
<b>Net Position - End of year</b>	<u><u>\$ (20.2)</u></u>	<u><u>\$ (21.8)</u></u>

As reported in the statement of activities, the cost of all of our governmental activities this year was \$22.7 million. Certain activities were partially funded from those who benefited from the programs (\$0.7 million) or by other governments and organizations that subsidized certain programs with grants and contributions (\$6.7 million). We paid for the remaining "public benefit" portion of our governmental activities with \$3.7 million in taxes, \$12.5 million in state foundation allowance, and with our other revenue (i.e., interest and general entitlements).

The School District experienced an increase in net position of \$1.6 million. Key reasons for the change in net position were the ongoing operations of the School District, as well as activity in the Sinking Fund.

As discussed above, the net cost shows the financial burden that was placed on the State and the School District's taxpayers by each of these functions. Since property taxes for operations and unrestricted state aid constitute the vast majority of district operating revenue sources, the Board of Education and administration must annually evaluate the needs of the School District and balance those needs with state-prescribed available unrestricted resources.

# Clarenceville School District of Oakland and Wayne Counties

---

## Management's Discussion and Analysis (Continued)

---

### **The School District's Funds**

As we noted earlier, the School District uses funds to help it control and manage money for particular purposes. Looking at funds helps the reader consider whether the School District is being accountable for the resources taxpayers and others provide to it and may provide more insight into the School District's overall financial health.

As the School District completed this year, the governmental funds reported a combined fund balance of \$5.9 million, which is a decrease of \$1.1 million from last year.

The fund balance in the Sinking Fund decreased by \$2.6 million, as a number of major projects were completed during the year, including renovation of the athletic field complex, middle school main parking lot, and the renovation of the high school front office. The School District collected \$1.3 million in voter-approved Sinking Fund millage in the current year. This millage is available to fund specific capital projects allowed by state law and approved by the voters.

In the General Fund, our principal operating fund, the fund balance increased by \$1.1 million to \$3.7 million. The General Fund's fund balance is available to fund costs related to allowable school operating purposes. The increase was the result of enrollment being higher than budgeted, hiring of replacement teachers at lower salaries, and the one-time receipt of \$450,000 from the dissolution of the workers' compensation self-insurance fund of which the School District was a member. The General Fund's fund balance is available to fund costs related to allowable school operating purposes.

Within our special revenue funds, the Food Service Fund balance increased by approximately \$71,000, while the Community Services Fund decreased by approximately \$155,000.

The fund balance in the Capital Projects Fund increased by approximately \$447,000, as several major expenditures were delayed until 2019-2020.

### **Budgetary Highlights**

Over the course of the year, the School District revises its budget as it attempts to deal with unexpected changes in revenue and expenditures. State law requires that the budget be amended to ensure that expenditures do not exceed appropriations. The final amendment to the budget was adopted in June 2019. A schedule showing the School District's original and final budget amounts compared with amounts actually paid and received is provided in required supplemental information of these financial statements.

Budgeted revenue was increased by \$1.38 million due to student enrollment being 86 students higher than budgeted, dissolution of the Workers' Compensation Fund referred to above, and the budgeting of carryover state categorical funds.

Budgeted expenditures were also increased by approximately \$676,000 to account for the offsetting expenditures related to budgeting of state categorical carryover and staffing adjustments related to increased enrollment.

Actual total instruction expenditures were approximately \$645,000 lower than budgeted due to federal grants, State GSRP, and At-Risk spending being less than budgeted.

# Clarenceville School District of Oakland and Wayne Counties

## Management's Discussion and Analysis (Continued)

### Capital Assets and Debt Administration

#### **Capital Assets**

As of June 30, 2019, the School District had \$14.8 million invested in a broad range of capital assets, including land, buildings, vehicles, furniture, and equipment. This amount represents a net increase (including additions, disposals, and depreciation) of approximately \$2.9 million, or 25.0 percent, from last year.

	2019	2018
Land	\$ 1,106,646	\$ 1,106,646
Buildings and improvements	12,946,824	9,936,117
Furniture and equipment	761,004	825,509
Buses and other vehicles	26,559	-
	<u>\$ 14,841,033</u>	<u>\$ 11,868,272</u>
Total capital assets - Net of accumulated depreciation		

This year's additions of \$4.0 million, before the impact of depreciation, included the renovation of the athletic field complex, middle school main parking lot, and the renovation of the high school front office. We present more detailed information about our capital assets in the notes to the financial statements.

#### **Debt**

At the end of this year, the School District had no bonded debt.

Other obligations include accrued vacation pay and sick leave. We present more detailed information about our long-term liabilities in the notes to the financial statements.

### Economic Factors and Next Year's Budgets and Rates

Our elected officials and administration consider many factors when setting the School District's 2019-2020 fiscal year budget. One of the most important factors affecting the budget is our student count. The state foundation revenue is determined by multiplying the blended student count by the foundation allowance per pupil. The 2019-2020 budget was adopted in June 2019 based on an estimate of students who will enroll in September 2019. Approximately 67.0 percent of total General Fund revenue is from the foundation allowance. Under state law, the School District cannot access additional property tax revenue for general operations. As a result, district funding is heavily dependent on the State's ability to fund local school operations. Based on early enrollment data at the start of the 2019 school year, we anticipate that the fall student count will be short of the estimates used in creating the 2020 budget. Once the final student count and related per pupil funding is validated, state law requires the School District to amend the budget if actual district resources are not sufficient to fund original appropriations.

Since the School District's revenue is heavily dependent on state funding and the health of the State's School Aid Fund, the actual revenue received depends on the State's ability to collect revenue to fund its appropriation to the School District. The State has yet to pass a school aid budget for 2019-2020 school year. The General Fund budget assumes a \$60 per pupil foundation increase, along with similar funding levels in categorical funding. At this point in time, the School District believes that the State has sufficient funds to fund the School District at this level.

### Contacting the School District's Management

This financial report is intended to provide our taxpayers, parents, and investors with a general overview of the School District's finances and to show the School District's accountability for the money it receives. If you have any questions about this report or need additional information, we welcome you to contact the business office.

June 30, 2019

### Note 1 - Nature of Business

Clarenceville School District of Oakland and Wayne Counties (the "School District") is a school district in the state of Michigan that provides educational services to students.

### Note 2 - Significant Accounting Policies

#### *Accounting and Reporting Principles*

The School District follows accounting principles generally accepted in the United States of America (GAAP) applicable to governmental units. Accounting and financial reporting pronouncements are promulgated by the Governmental Accounting Standards Board. The following is a summary of the significant accounting policies used by the School District:

#### *Reporting Entity*

The School District is governed by an elected seven-member Board of Education. In accordance with government accounting principles, there are no separate legal entities appropriate to be reported within these financial statements.

#### *Report Presentation*

Governmental accounting principles require that financial reports include two different perspectives - the government-wide perspective and the fund-based perspective. The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all of the nonfiduciary activities of the primary government and its component units, as applicable. The government-wide financial statements are presented on the economic resources measurement focus and the full accrual basis of accounting. Property taxes are recognized as revenue in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met. The statements also present a schedule reconciling these amounts to the modified accrual-based presentation found in the fund-based statements.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenue. Direct expenses are those that are clearly identifiable with a specific function or segment. Program revenue includes: (1) charges to customers or applicants for goods, services, or privileges provided; (2) operating grants and contributions; and (3) capital grants and contributions, including special assessments. Taxes, unrestricted intergovernmental receipts, and other items not properly included among program revenue are reported instead as general revenue.

As a general rule, the effect of interfund activity has been removed from the government-wide financial statements.

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds even though the latter are excluded from the government-wide financial statements. Major individual governmental funds and major individual enterprise funds, if any, are reported as separate columns in the fund financial statements.

June 30, 2019

### Note 2 - Significant Accounting Policies (Continued)

#### ***Fund Accounting***

The School District accounts for its various activities in several different funds in order to demonstrate accountability for how it spends certain resources; separate funds allow the School District to show the particular expenditures for which specific revenue is used. The various funds are aggregated into three broad fund types:

#### **Governmental Funds**

Governmental funds include all activities that provide general governmental services that are not business-type activities. Governmental funds can include the General Fund, special revenue funds, debt service funds, capital project funds, and permanent funds. The School District reports the following funds as "major" governmental funds:

- The General Fund is the primary operating fund because it accounts for all financial resources used to provide government services other than those specifically assigned to another fund.
- The Sinking Fund records capital projects activities funded with Sinking Fund millage

Additionally, the School District reports the following nonmajor governmental fund types:

- Special revenue funds are used to account for the proceeds of specific revenue sources that are restricted or committed to expenditure for specified purposes.
- Capital projects funds are used to record bond proceeds property tax revenue or other revenue and the disbursement of invoices specifically designated for acquiring new school sites, buildings, equipment, technology upgrades, and for remodeling and repairs. The funds operate until the purpose for which they were created is accomplished.

#### **Fiduciary Funds**

Fiduciary funds include amounts held in a fiduciary capacity for others. These amounts are not used to operate the School District's programs. The School District maintains a student activity agency fund to record the transactions of student groups for school and school-related purposes. The funds are segregated and are held for the students.

The Private Purpose Trust Fund is used to account for resources held for a specified purpose, including contributions received by the School District to be awarded in the form of scholarships.

#### **Interfund Activity**

During the course of operations, the School District has activity between funds for various purposes. Any residual balances outstanding at year end are reported as due from/to other funds and advances to/from other funds. While these balances are reported in fund financial statements, certain eliminations are made in the preparation of the government-wide financial statements. Balances between the funds included in governmental activities (i.e., the governmental and internal service funds) are eliminated so that only the net amount is included as internal balances in the governmental activities column.

Furthermore, certain activity occurs during the year involving transfers of resources between funds. In the fund financial statements, these amounts are reported at gross amounts as transfers in/out. While reported in fund financial statements, certain eliminations are made in the preparation of the government-wide financial statements. Transfers between the funds included in governmental activities are eliminated so that only the net amount is included as transfers in the governmental activities column.

**Note 2 - Significant Accounting Policies (Continued)**

***Basis of Accounting***

The governmental funds use the current financial resources measurement focus and the modified accrual basis of accounting. This basis of accounting is intended to better demonstrate accountability for how the School District has spent its resources.

Expenditures are reported when the goods are received or the services are rendered. Capital outlays are reported as expenditures (rather than as capital assets) because they reduce the ability to spend resources in the future; conversely, employee benefit costs that will be funded in the future (such as pension and retiree healthcare-related costs or sick and vacation pay) are not counted until they come due for payment. In addition, debt service expenditures, claims, and judgments are recorded only when payment is due.

Revenue is not recognized until it is collected, or collected soon enough after the end of the year that it is available to pay for obligations outstanding at the end of the year. For this purpose, the School District considers amounts collected within 60 days of year end to be available for recognition. Revenue not meeting this definition is classified as a deferred inflow of resources.

Fiduciary funds use the economic resources measurement focus and the full accrual basis of accounting. Revenue is recorded when earned, and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows.

***Specific Balances and Transactions***

**Cash and Investments**

Cash and cash equivalents include cash on hand, demand deposits, and short-term investments with a maturity of three months or less when acquired. Investments are stated at fair value.

**Inventories and Prepaid Items**

Inventories are valued at cost, on a first-in, first-out basis. Inventories accounted for using the purchase method are recorded as expenditures when purchased and include all inventories of governmental funds other than commodities within the Food Service Fund. Inventories accounted for using the consumption method are recorded as expenditures when consumed rather than when purchased and include commodities within the Food Service Fund. Certain payments to vendors reflect costs applicable to future fiscal years and are recorded as prepaid items in both government-wide and fund financial statements, when applicable.

**Restricted Assets**

The following amounts are reported as restricted assets:

- Unspent property taxes levied and held in the Sinking Fund required to be set aside for construction or allowable purchases

**Capital Assets**

Capital assets are reported in the applicable governmental activities column in the government-wide financial statements. Capital assets are defined by the School District as assets with an initial individual cost of more than \$5,000 and an estimated useful life in excess of one year. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated acquisition value at the date of donation.

Note 2 - Significant Accounting Policies (Continued)

Capital assets are depreciated using the straight-line method over the following useful lives:

	Depreciable Life - Years
Buildings and improvements	20 - 50
Furniture and equipment	5 - 10
Buses and other vehicles	5 - 10

**Long-term Obligations**

In the government-wide financial statements and the proprietary fund types in the fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities statement of net position. Bond premiums and discounts are deferred and amortized over the lives of the bonds using the effective interest method. Bonds payable are reported net of the applicable bond premium or discount. Bond issuance costs are expensed at the time they are incurred. In the fund financial statements, governmental fund types recognize bond issuances and premiums as "other financing sources" and bond discounts as "other financing uses." The General Fund is generally used to liquidate governmental long-term debt.

**Deferred Outflows/Inflows of Resources**

In addition to assets, the statement of net position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element represents a consumption of net position that applies to future periods and will not be recognized as an outflow of resources (expense/expenditure) until then.

The School District reports deferred outflows related to pension and OPEB plan costs.

In addition to liabilities, the statement of net position will sometimes report a separate section for deferred inflows of resources. This separate financial statement element represents an acquisition of net position that applies to future periods and will not be recognized as an inflow of resources (revenue) until that time.

The School District reports deferred inflows related to revenue in support of pension contributions made subsequent to the measurement date and deferred pension and OPEB plan cost reductions.

**Net Position**

Net position of the School District is classified in three components. Net investment in capital assets consists of capital assets net of accumulated depreciation and is reduced by the current balances of any outstanding borrowings used to finance the purchase or construction of those assets. The restricted component of net position consists of restricted assets reduced by liabilities and deferred inflows of resources related to those assets. Unrestricted net position is the remaining net position that does not meet the definition of invested in capital or restricted.

**Net Position Flow Assumption**

The School District will sometimes fund outlays for a particular purpose from both restricted and unrestricted resources. In order to calculate the amounts to report as restricted net position and unrestricted net position in the government-wide and proprietary fund financial statements (as applicable), a flow assumption must be made about the order in which the resources are considered to be applied. It is the School District's policy to consider restricted net position to have been depleted before unrestricted net position is applied.

**Note 2 - Significant Accounting Policies (Continued)**

**Fund Balance Flow Assumptions**

The School District will sometimes fund outlays for a particular purpose from both restricted and unrestricted resources (the total of committed, assigned, and unassigned fund balance). In order to calculate the amounts to report as restricted, committed, assigned, and unassigned fund balance in the governmental fund financial statements, a flow assumption must be made about the order in which the resources are considered to be applied. It is the School District's policy to consider restricted fund balance to have been depleted before using any of the components of unrestricted fund balance. Furthermore, when the components of unrestricted fund balance can be used for the same purpose, committed fund balance is depleted first followed by assigned fund balance. Unassigned fund balance is applied last.

**Fund Balance Policies**

Fund balance of governmental funds is reported in various categories based on the nature of any limitations requiring the use of resources for specific purposes. The nonspendable fund balance component represents amounts that are not in spendable form or are legally or contractually required to be maintained intact. Restricted fund balance represents amounts that are legally restricted by outside parties, constitutional provisions, or enabling legislation for use for a specific purpose. The School District itself can establish limitations on the use of resources through either a commitment (committed fund balance) or an assignment (assigned fund balance).

The committed fund balance classification includes amounts that can be used only for the specific purposes determined by a formal action of the School District's highest level of decision-making authority. The Board of Education is the highest level of decision-making authority for the School District that can, by passing a resolution prior to the end of the fiscal year, commit fund balance. Once passed, the limitation imposed by the resolution remains in place until a similar action is taken (the passing of another resolution) to remove or revise the limitation.

Amounts in the assigned fund balance classification are intended to be used by the government for specific purposes but do not meet the criteria to be classified as committed. The School District has, by resolution, authorized the assistant superintendent to assign fund balance. The Board of Education may also assign fund balance as it does when appropriating fund balance to cover a gap between estimated revenue and appropriations in the subsequent year's appropriated budget. Unlike commitments, assignments generally only exist temporarily. In other words, an additional action does not normally have to be taken for the removal of an assignment. Conversely, as discussed above, an additional action is essential to either remove or revise a commitment.

**Property Tax Revenue**

Properties are assessed as of December 31, and the related property taxes become a lien on July 1 of the following year. These taxes are billed on July 1 for approximately 50 percent of the taxes and on December 1 for the remainder of the property taxes. Tax collections are forwarded to the School District, as collected by the assessing municipalities through March 1, at which time they are considered delinquent and added to county tax rolls. Any delinquent taxes collected by the county are remitted to the School District by June 30. The School District considers all receivables to be fully collectible; accordingly, no allowance for uncollectible amounts is recorded.

The School District receives reduced property tax revenue as a result of Industrial Facilities Tax exemptions (PA 198 of 1974) and Brownfield Tax Credits granted by cities, villages, and townships within the boundaries of the School District. The effect of the reduced property tax revenue on the School District is nominal.

**Note 2 - Significant Accounting Policies (Continued)**

**Grants and Contributions**

The School District receives federal, state, and local grants, as well as contributions from individuals and private organizations. Revenue from grants and contributions (including contributions of capital assets) is recognized when all eligibility requirements, including time requirements, are met. Grants and contributions may be restricted for either specific operating purposes or for capital purposes. Amounts that are unrestricted or that are restricted to a specific operating purpose are reported as nonoperating revenue. Amounts restricted to capital acquisitions are reported after nonoperating revenue and expenses.

**Pension and Other Postemployment Benefit (OPEB) Plans**

For the purpose of measuring the net pension and net OPEB liabilities, deferred outflows of resources and deferred inflows of resources related to each plan, and pension and OPEB expense, information about the fiduciary net position of the Michigan Public School Employees' Retirement System (MPERS) and additions to/deductions from MPERS fiduciary net position have been determined on the same basis as they are reported by MPERS. MPERS uses the economic resources measurement focus and the full accrual basis of accounting. Contribution revenue is recorded as contributions are due, pursuant to legal requirements. Benefit payments (including refunds of employee contributions) are recognized as expenses when due and payable in accordance with the plan benefit terms. Related plan investments are reported at fair value.

**Compensated Absences (Vacation and Sick Leave)**

It is the School District's policy to permit employees to accumulate earned but unused sick and vacation pay benefits. Sick pay is accrued for the estimated amount that the School District will pay upon employment termination; vacation pay is accrued when incurred. Both of these are reported in the government-wide and proprietary fund financial statements. A liability for these amounts is reported in governmental funds only for employee terminations as of year end. Generally, the funds that report each employee's compensation are used to liquidate the obligations.

**Use of Estimates**

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

**Upcoming Accounting Pronouncements**

In January 2017, the Governmental Accounting Standards Board (GASB) issued Statement No. 84, *Fiduciary Activities*. This statement establishes criteria for identifying fiduciary activities of all state and local governments. An activity meeting the criteria should be reported in a fiduciary fund in the basic financial statements. The School District has evaluated the impact this standard will have on the financial statements. As of July 1, 2019, the School District will report the activities and related balances currently reported as fiduciary in a newly created special revenue fund.

**Note 2 - Significant Accounting Policies (Continued)**

In June 2017, the GASB issued Statement No. 87, *Leases*, which improves accounting and financial reporting for leases by governments. This statement requires recognition of certain lease assets and liabilities for leases that previously were classified as operating leases and recognized as inflows of resources or outflows of resources based on the payment provisions of the contract. It establishes a single model for lease accounting based on the foundational principle that leases are financings of the right to use an underlying asset. Under this statement, a lessee is required to recognize a lease liability and an intangible right-to-use lease asset, and a lessor is required to recognize a lease receivable and a deferred inflow of resources. The School District is currently evaluating the impact this standard will have on the financial statements when adopted. The provisions of this statement are effective for the School District's financial statements for the year ending June 30, 2021.

**Note 3 - Stewardship, Compliance, and Accountability**

***Budgetary Information***

Annual budgets are adopted on a basis consistent with generally accepted accounting principles and state law for the General Fund and all special revenue funds. All annual appropriations lapse at fiscal year end. The budget document presents information by fund and function. The legal level of budgetary control adopted by the governing body (i.e., the level at which expenditures may not legally exceed appropriations) is the function level. State law requires the School District to have its budget in place by July 1. Expenditures in excess of amounts budgeted are a violation of Michigan law. State law permits districts to amend their budgets during the year. The required supplemental information - budgetary comparison schedule is presented on the same basis of accounting used to prepare the budget, which includes certain items having classifications that differ from the statement of revenue, expenditures, and changes in fund balances. During the year, the budget was amended in a legally permissible manner. There were no significant amendments during the year.

Encumbrance accounting is employed in governmental funds. Encumbrances (e.g. purchase orders or contracts) are not tracked during the year. Budget appropriations are considered to be spent once the goods are delivered or the services rendered.

***Excess of Expenditures Over Appropriations in Budgeted Funds***

The School District did not have significant expenditure budget variances.

***Capital Projects Fund Compliance***

The Sinking Fund records capital project activities funded with Sinking Fund millage. For this fund, authorized prior to March 29, 2017, the School District has complied with the applicable provisions of §1212 of the State of Michigan Revised School Code.

**Note 4 - Deposits and Investments**

State statutes and the School District's investment policy authorize the School District to make deposits in the accounts of federally insured banks, credit unions, and savings and loan associations that have offices in Michigan. The School District is allowed to invest in U.S. Treasury or agency obligations, U.S. government repurchase agreements, bankers' acceptances, certificates of deposit, commercial paper rated prime at the time of purchase that matures not more than 270 days after the date of purchase, mutual funds, and investment pools that are composed of authorized investment vehicles. The School District's deposits and investments are in accordance with statutory authority.

The School District has designated two financial institutions for the deposit of its funds.

**Note 4 - Deposits and Investments (Continued)**

There are no limitations or restrictions on participant withdrawals for the investment pools that are recorded at amortized cost except for the School District's investments in the Michigan Liquid Asset Fund Plus - MAX Class fund may not be redeemed for at least 14 calendar days, with the exception of direct investments of funds distributed by the State. Redemptions made prior to the applicable 14-day period are subject to a penalty equal to 15 days' interest on the amount so redeemed. There are no limitations or restrictions on participant withdrawals for the School District's other investment pools that are recorded at amortized cost.

The School District's cash and investments are subject to several types of risk, which are examined in more detail below:

**Custodial Credit Risk of Bank Deposits**

Custodial credit risk is the risk that, in the event of a bank failure, the School District's deposits may not be returned to it. The School District's investment policy requires that financial institutions be evaluated and only those with an acceptable risk level are used for the School District's deposits for custodial credit risk. At year end, the School District had \$790,724 of bank deposits (checking accounts) that were uninsured and uncollateralized.

**Custodial Credit Risk of Investments**

Custodial credit risk is the risk that, in the event of the failure of the counterparty, the School District will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. The School District does not have a policy for custodial credit risk. At June 30, 2019, the School District does not have investments with custodial credit risk.

**Interest Rate Risk**

Interest rate risk is the risk that the value of investments will decrease as a result of a rise in interest rates. The School District's investment policy does not restrict investment maturities other than commercial paper, which can only be purchased with a 270-day maturity.

**Credit Risk**

State law limits investments in commercial paper to the top two ratings issued by nationally recognized statistical rating organizations. The School District has no investment policy that would further limit its investment choices. As of June 30, 2019, the credit quality ratings of debt securities (other than the U.S. government) are as follows:

Investment	Carrying Value	Rating	Rating Organization
<b>Primary Government</b>			
Money market	\$ 598,373	AAAm	S&P
Bank investment pool	4,447,782	AAAm	S&P
Total	<u>\$ 5,046,155</u>		

**Concentration of Credit Risk**

The School District places no limit on the amount it may invest in any one issuer. The School District does not have any investments subject to concentration of credit risk.

**Foreign Currency Risk**

Foreign currency risk is the risk that an investment denominated in the currency of a foreign country could reduce its U.S. dollar value as a result of changes in foreign currency exchange rates. State law and the School District's investment policy prohibit investments in foreign currency.

# Clarenceville School District of Oakland and Wayne Counties

## Notes to Financial Statements

June 30, 2019

### Note 5 - Restricted Assets

At June 30, 2019, restricted assets are composed of the following:

Description	Governmental Activities
Unspent property taxes levied for the Sinking Fund	\$ 945,345

### Note 6 - Unavailable/Unearned Revenue

Governmental funds report unavailable revenue in connection with receivables for revenue that is not considered to be available to liquidate liabilities of the current period. Governmental funds also report unearned revenue recognition in connection with resources that have been received but not yet earned.

At June 30, 2019, the School District had \$162,764 unavailable revenue, primarily related to federal grant revenue not received as of year end, and \$536,059 of unearned revenue related to grant and categorical aid payments received prior to meeting all eligibility requirements.

### Note 7 - Capital Assets

Capital asset activity of the School District's governmental activities was as follows:

#### Governmental Activities

	Balance July 1, 2018	Additions	Disposals/ Transfers	Balance June 30, 2019
Capital assets not being depreciated - Land	\$ 1,106,646	\$ -	\$ -	\$ 1,106,646
Capital assets being depreciated:				
Buildings and building improvements	23,514,901	3,882,821	(38,263)	27,359,459
Furniture and equipment	6,087,207	106,169	(1,547,184)	4,646,192
Buses and other vehicles	557,293	26,559	-	583,852
Subtotal	30,159,401	4,015,549	(1,585,447)	32,589,503
Accumulated depreciation:				
Buildings and improvements	13,578,784	872,114	(38,263)	14,412,635
Furniture and equipment	5,261,698	170,674	(1,547,184)	3,885,188
Buses and other vehicles	557,293	-	-	557,293
Subtotal	19,397,775	1,042,788	(1,585,447)	18,855,116
Net capital assets being depreciated	10,761,626	2,972,761	-	13,734,387
Net capital assets	\$ 11,868,272	\$ 2,972,761	\$ -	\$ 14,841,033

Depreciation expense was not charged to activities, as the School District considers its assets to benefit multiple activities, and allocation is not practical.

#### Construction Commitments

The School District has active construction projects as of June 30, 2019 related to various school improvements. The remaining costs of the projects will be financed with proceeds collected from the Sinking Fund millage. At year end, the School District has spent approximately \$1,659,000 on contracts that were open at June 30, 2019 with approximately \$157,000 remaining to be completed.

# Clarenceville School District of Oakland and Wayne Counties

## Notes to Financial Statements

June 30, 2019

### Note 8 - Interfund Receivables, Payables, and Transfers

The composition of interfund balances is as follows:

Fund Due To	Fund Due From	
	Fiduciary Funds	Total
General Fund	\$ 20,819	\$ 20,819
Fiduciary funds	2,352	2,352
Total	\$ 23,171	\$ 23,171

These balances result from the time lag between the dates that goods and services are provided or reimbursable expenditures occur, transactions are recorded in the accounting system, and payments between funds are made. At June 30, 2019, the fiduciary funds owed the General Fund for costs paid for on behalf of the fiduciary funds. Additionally, the fiduciary funds share a common bank account of which a portion is owed to the other.

Interfund transfers reported in the fund financial statements are composed of the following:

Paying Fund (Transfer Out)	Receiving Fund (Transfer In)	Amount
Nonmajor governmental funds	General Fund	\$ 46,258
	Nonmajor governmental funds	250,000
General Fund	Nonmajor governmental funds	295,000

Transfers from the General Fund and Community Service Fund provided funding for various capital projects. Funds from the Food Service Fund were transferred to the General Fund to cover excess costs related to operations of the fund for the purpose for which it was created.

### Note 9 - Long-term Debt

Long-term debt activity for the year ended June 30, 2019 can be summarized as follows:

	Beginning Balance	Additions	Reductions	Ending Balance	Due within One Year
Compensated absences	\$ 429,503	\$ 25,494	\$ (45,834)	\$ 409,163	\$ 49,812

### Note 10 - Risk Management

The School District is exposed to various risks of loss related to property loss, torts, errors and omissions, and employee injuries (workers' compensation), as well as medical benefits provided to employees. The School District has purchased commercial insurance for medical claims and participates in the MAISL shared-risk pool for claims relating to property loss, torts, errors, omissions, and employee injuries. Settled claims relating to the commercial insurance have not exceeded the amount of insurance coverage in any of the past three fiscal years.

The shared-risk pool program in which the School District participates operates as a common risk-sharing management program for school districts in Michigan; member premiums are used to purchase commercial excess insurance coverage and to pay member claims in excess of deductible amounts.

June 30, 2019

### Note 11 - Michigan Public School Employees' Retirement System

#### *Plan Description*

The School District participates in the Michigan Public School Employees' Retirement System (MPSERS or the "System"), a statewide, cost-sharing, multiple-employer defined benefit public employee retirement system governed by the State of Michigan that covers substantially all employees of the School District. Certain school district employees also receive defined contribution retirement and healthcare benefits through the System. The System provides retirement, survivor, and disability benefits to plan members and their beneficiaries. The System also provides postemployment healthcare benefits to retirees and beneficiaries who elect to receive those benefits.

The System is administered by the Office of Retirement Services (ORS). The Michigan Public School Employees' Retirement System issues a publicly available financial report that includes financial statements and required supplemental information for the pension and postemployment healthcare plans. That report is available on the web at <http://www.michigan.gov/orsschools> or by writing to the Office of Retirement System (ORS) at 7150 Harris Drive, P.O. Box 30171, Lansing, MI 48909.

#### *Benefits Provided*

Benefit provisions of the defined benefit (DB) pension plan and the postemployment healthcare plan are established by state statute, which may be amended. Public Act 300 of 1980, as amended, establishes eligibility and benefit provisions for the defined benefit pension plan and the postemployment healthcare plan.

Depending on the plan option selected, member retirement benefits are calculated as final average compensation times years of services times a pension factor ranging from 1.25 percent to 1.50 percent. The requirements to retire range from attaining the age of 46 to 60 with years of service ranging from 5 to 30 years, depending on when the employee became a member. Early retirement is computed in the same manner as a regular pension, but is permanently reduced 0.50 percent for each full and partial month between the pension effective date and the date the member will attain age 60. There is no mandatory retirement age.

Depending on the member's date of hire, MPSERS offers the option of participating in the defined contribution (DC) plan that provides a 50 percent employer match (up to 3 percent of salary) on employee contributions.

Members are eligible for nonduty disability benefits after 10 years of service and for duty-related disability benefits upon hire. Disability retirement benefits are determined in the same manner as retirement benefits, but are payable immediately without an actuarial reduction. The disability benefits plus authorized outside earnings are limited to 100 percent of the participant's final average compensation, with an increase of 2 percent each year thereafter.

Benefits may transfer to a beneficiary upon death and are determined in the same manner as retirement benefits, but with an actuarial reduction.

Benefit terms provide for annual cost of living adjustments to each employee's retirement allowance subsequent to the employee's retirement date. The annual adjustment, if applicable, is 3 percent. Some members who do not receive an annual increase are eligible to receive a supplemental payment in those years when investment earnings exceed actuarial assumptions.

MPSERS provides medical, prescription drug, dental, and vision coverage for retirees and beneficiaries. A subsidized portion of the premium is paid by MPSERS, with the balance deducted from the monthly pension of each retiree healthcare recipient. Depending on the member's date of hire, this subsidized portion ranges from 80 percent to the maximum allowed by the statute.

**Note 11 - Michigan Public School Employees' Retirement System (Continued)**

**Contributions**

Public Act 300 of 1980, as amended, required the School District to contribute amounts necessary to finance the coverage of pension benefits of active and retired members. Contribution provisions are specified by state statute and may be amended only by action of the state Legislature. Under these provisions, each school district's contribution is expected to finance the costs of benefits earned by employees during the year, with an additional amount to finance a portion of the unfunded accrued liability.

Under the OPEB plan, retirees electing this coverage contribute an amount equivalent to the monthly cost for Part B Medicare and 10 percent, or 20 percent for those not Medicare eligible, of the monthly premium amount for the health, dental, and vision coverage at the time of receiving the benefits. The MPSERS board of trustees annually sets the employer contribution rate to fund the benefits. Participating employers are required to contribute at that rate.

Under Public Act 300 of 2012, members were given the choice between continuing the 3 percent contribution to the retiree health care and keeping the premium subsidy benefit described above, or choosing not to pay the 3 percent contribution and, instead, opting out of the subsidy benefit and becoming a participant in the Personal Healthcare Fund (PHF), a portable tax-deferred fund that can be used to pay healthcare expenses in retirement. Participants in the PHF are automatically enrolled in a 2 percent employee contribution into their 457 account as of their transition date, earning them a 2 percent employer match into a 401(k) account. Members who selected this option stop paying the 3 percent contribution to the retiree health care as of the day before their transition date, and their prior contributions were deposited into their 401(k) account.

The School District's contributions are determined based on employee elections. There are multiple different pension and healthcare benefit options included in the plan available to employees based on date of hire and the elections available at that time. Contribution rates are adjusted annually by the ORS.

The range of rates is as follows:

	Pension	OPEB
October 1, 2017 - January 31, 2018	13.54% - 17.89%	7.42% - 7.67%
February 1, 2018 - September 30, 2018	13.54% - 19.74%	7.42% - 7.67%
October 1, 2018 - September 30, 2019	13.39% - 19.59%	7.57% - 7.93%

Depending on the plan selected, member pension contributions range from 0 percent up to 7.0 percent of gross wages. For certain plan members, a 4 percent employer contribution to the defined contribution pension plan is required. In addition, for certain plan members, a 3 percent employer match is provided to the defined contribution pension plan.

The School District's required and actual pension contributions to the plan for the year ended June 30, 2019 were \$3,186,611, which include the School District's contributions required for those members with a defined contribution benefit. The School District's required and actual pension contributions include an allocation of \$1,310,306 in revenue received from the State of Michigan and remitted to the System to fund the MPSERS unfunded actuarial accrued liability (UAAL) stabilization rate for the year ended June 30, 2019.

The School District's required and actual OPEB contributions to the plan for the year ended June 30, 2019 were \$841,599, which include the School District's contributions required for those members with a defined contribution benefit.

**Note 11 - Michigan Public School Employees' Retirement System (Continued)**

**Net Pension Liability**

At June 30, 2019, the School District reported a liability of \$36,463,043 for its proportionate share of the net pension liability. The net pension liability was measured as of September 30, 2018, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of September 30, 2017, which used updated procedures to roll forward the estimated liability to September 30, 2018. The School District's proportion of the net pension liability was based on a projection of its long-term share of contributions to the pension plan relative to the projected contributions of all participating reporting units, actuarially determined. At September 30, 2018 and 2017, the School District's proportion was 0.12 and 0.12 percent, respectively.

**Net OPEB Liability**

At June 30, 2019, the School District reported a liability of \$9,434,342 for its proportionate share of the net OPEB liability. The net OPEB liability for fiscal year 2019 was measured as of September 30, 2018, and the total OPEB liability used to calculate the net OPEB liability was determined by an actuarial valuation as of September 30, 2017, which used updated procedures to roll forward the estimated liability to September 30, 2018. The School District's proportion of the net OPEB liability was based on a projection of its long-term share of contributions to the OPEB plan relative to the projected contributions of all participating reporting units, actuarially determined. At September 30, 2018 and 2017, the School District's proportion was 0.12 and 0.12 percent, respectively.

**Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions**

For 2019, the School District recognized pension expense of \$4,115,202, inclusive of payments to fund the MPSERS UAAL stabilization rate. At June 30, 2019, the School District reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	\$ 169,195	\$ (264,971)
Changes in assumptions	8,444,811	-
Net difference between projected and actual earnings on pension plan investments	-	(2,493,145)
Changes in proportion and differences between the School District's contributions and proportionate share of contributions	12,838	(1,132,734)
The School District's contributions to the plan subsequent to the measurement date	2,695,762	-
Total	\$ 11,322,606	\$ (3,890,850)

The \$1,310,306 reported as deferred inflows of resources resulting from the pension portion of state aid payments received pursuant to the UAAL payment will be recognized as state appropriations revenue for the year ended June 30, 2020. Amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

Years Ending	Amount
2020	\$ 1,933,670
2021	1,386,843
2022	1,003,878
2023	411,603
Total	\$ 4,735,994

# Clarenceville School District of Oakland and Wayne Counties

## Notes to Financial Statements

June 30, 2019

### Note 11 - Michigan Public School Employees' Retirement System (Continued)

In addition, the contributions subsequent to the measurement date will be included as a reduction of the net pension liability in the next year.

#### **OPEB Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to OPEB**

For the year ended June 30, 2019, the School District recognized OPEB expense of \$376,952.

At June 30, 2019, the School District reported deferred outflows of resources and deferred inflows of resources related to OPEB from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	\$ -	\$ (1,755,973)
Changes in assumptions	999,102	-
Net difference between projected and actual earnings on OPEB plan investments	-	(362,584)
Changes in proportionate share or difference between amount contributed and proportionate share of contributions	-	(384,598)
Employer contributions to the plan subsequent to the measurement date	606,031	-
Total	<u>\$ 1,605,133</u>	<u>\$ (2,503,155)</u>

Amounts reported as deferred outflows of resources and deferred inflows of resources related to OPEB will be recognized in OPEB expense as follows (note that employer contributions subsequent to the measurement date will reduce the net OPEB liability and, therefore, will not be included in future OPEB expense):

Years Ending	Amount
2020	\$ (360,037)
2021	(360,037)
2022	(360,037)
2023	(286,034)
2024	(137,908)
Total	<u>\$ (1,504,053)</u>

#### **Actuarial Assumptions**

The total pension liability and total OPEB liability as of September 30, 2018 is based on the results of an actuarial valuation as of September 30, 2017 and rolled forward. The total pension liability and OPEB liability were determined using the following actuarial assumptions:

Actuarial cost method		Entry age normal cost actuarial cost method
Investment rate of return - Pension	6.00% - 7.05%	Net of investment expenses based on the groups
Investment rate of return - OPEB	7.15%	Net of investment expenses based on the groups
Salary increases	2.75% - 11.55%	Including wage inflation of 2.75 percent for 2019 and 3.50 percent for 2018
Healthcare cost trend rate - OPEB	7.50%	(Year 1 graded to 3.0 percent year 12)
Mortality basis		RP2014 Male and Female Employee Annuitant Mortality tables, scaled 100 percent (retirees: 82 percent for males and 78 percent for females) and adjusted for mortality improvements using projection scale MP2017 from 2006
Cost of living pension adjustments	3.00%	Annual noncompounded for MIP members

**Note 11 - Michigan Public School Employees' Retirement System (Continued)**

Assumption changes as a result of an experience study for the periods from 2012 to 2017 have been adopted by the System for use in the annual pension and OPEB valuations beginning with the September 30, 2014 valuation.

**Discount Rate**

The discount rate used to measure the total pension liability was 6.00 to 7.05 percent as of September 30, 2018 depending on the plan option. The discount rate used to measure the total OPEB liability was 7.15 percent as of September 30, 2018. The projection of cash flows used to determine the discount rate assumed that employee contributions will be made at the current contribution rate and that district contributions will be made at statutorily required rates.

Based on those assumptions, the pension plan's fiduciary net position and the OPEB plan's fiduciary net position were projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return on pension plan and OPEB plan investments was applied to all periods of projected benefit payments to determine the total pension liability and total OPEB liability.

The long-term expected rate of return on pension plan and OPEB plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target allocation and best estimates of arithmetic real rates of return for each major asset class are summarized in the following table:

Asset Class	Target Allocation	Long-term Expected Real Rate of Return
Domestic equity pools	28.00 %	5.70 %
Private equity pools	18.00	9.20
International equity pools	16.00	7.20
Fixed-income pools	10.50	0.50
Real estate and infrastructure pools	10.00	3.90
Absolute return pools	15.50	5.20
Short-term investment pools	2.00	-
Total	100.00 %	

**Sensitivity of the Net Pension Liability to Changes in the Discount Rate**

The following presents the net pension liability of the School District, calculated using the discount rate depending on the plan option. The following also reflects what the School District's net pension liability would be if it were calculated using a discount rate that is 1 percentage point lower or 1 percentage point higher than the current rate:

	1 Percent Decrease (5.00 - 6.05%)	Current Discount Rate (6.00 - 7.05%)	1 Percent Increase (7.00 - 8.05%)
Net pension liability of the School District	\$ 47,873,159	\$ 36,463,043	\$ 26,983,091

June 30, 2019

**Note 11 - Michigan Public School Employees' Retirement System (Continued)**

***Sensitivity of the Net OPEB Liability to Changes in the Discount Rate***

The following presents the net OPEB liability of the School District, calculated using the current discount rate. It also reflects what the School District's net OPEB liability would be if it were calculated using a discount rate that is 1 percentage point lower or 1 percentage point higher than the current rate:

	1 Percent Decrease (6.15%)	Current Discount Rate (7.15%)	1 Percent Increase (8.15%)
Net OPEB liability of the School District	\$ 11,325,736	\$ 9,434,342	\$ 7,843,449

***Sensitivity of the Net OPEB Liability to Changes in the Healthcare Cost Trend Rate***

The following presents the net OPEB liability of the School District, calculated using the current healthcare cost trend rate. It also reflects what the School District's net OPEB liability would be if it were calculated using a healthcare cost trend rate that is 1 percentage point lower or 1 percentage point higher than the current rate:

	1 Percent Decrease (6.50%)	Current Rate (7.50%)	1 Percent Increase (8.50%)
Net OPEB liability of the School District	\$ 7,759,643	\$ 9,434,342	\$ 11,355,565

***Pension Plan and OPEB Plan Fiduciary Net Position***

Detailed information about the plan's fiduciary net position is available in the separately issued MPSERS financial report.

***Payable to the Pension Plan and OPEB Plan***

At June 30, 2019, the School District reported a payable of \$506,433 and \$117,268 for the outstanding amount of contributions to the pension plan and OPEB plan, respectively, required for the year ended June 30, 2019.

### Notes to Pension Required Supplemental Information Schedules

---

June 30, 2019

#### ***Pension Information***

Ultimately, 10 years of data will be presented in both of the pension-related schedules. The number of years currently presented represents the number of years since the accounting standard requiring these schedules first became applicable.

#### **Benefit Changes**

There were no changes of benefit terms in for each of the plan years ended September 30.

#### **Changes in Assumptions**

There were no significant changes of assumptions for each of the reported plan years ended September 30, except for the following:

- 2018 - The discount rate used in the September 30, 2017 actuarial valuation decreased by 0.45 percent.
- 2017 - The discount rate used in the September 30, 2018 actuarial valuation decreased by 0.50 percent.

#### ***OPEB Information***

Ultimately, 10 years of data will be presented in both of the OPEB-related schedules. The number of years currently presented represents the number of years since the accounting standard requiring these schedules first became applicable.

#### **Benefit Changes**

There were no changes of benefit terms in for each of the plan years ended September 30.

#### **Changes in Assumptions**

There were no changes of benefit assumptions in 2018.

There were no significant changes of assumptions for each of the reported plan year ended September 30, except for the following:

- 2018 - The discount rate used in the September 30, 2017 actuarial valuation decreased by 0.35 percent.
